DAG exercise

1. Grant user rights (full access) to users CTEBE and NPALLARES for your project.

2. Create a data entry role with 'View & Edit' permissions and a visualisation role with 'Read only' permissions.

3. Create the following DAGs: Hospital A, Hospital B and Hospital C.

4. Add a course colleague to your project with a data entry role and access to only one DAG.

5. Add a course colleague to your project with a visualisation role and access to all DAGs.
